

1 Introduction

2 Background

2.1 Microscopes and digital images

Schematic of a confocal microscope

Sample of digital images

2.2 Image manipulation

Edge detection example

Blob detection example

Example of complex machine learning

2.3 Cell segmentation

Squassh example

Cellprofiler example

3 Apparatus

3.1 The micro-fluidics environment

Micro-fluidics environment schematic

3.2 The microscope

Schematic of a confocal microscope

3.3 Django

Database model flowchart

3.4 CellProfiler

Screenshot of modules and operation

4 Method

4.1 Definitions

4.2 Generating zMod

GFP profile image

GFP profile scatter plot

zMod example

zMod 3D example

4.3 Manual tracking

zComp example
Primary image
Primary image overlaid onto zBF

4.4 Generating zDiff for segmentation round one

zDiff for single marker
Combined zDiff
Segmented zDiff from Cellprofiler

4.5 Generating zEdge for segmentation round two

Brightfield edge curves
zEdge example
Segmented zEdge from Cellprofiler

4.6 Cell confidence

Cell area over time

5 Results

5.1 Image modification

5.1.1 zMod

zMod example
zMod several single cells
zMod 3D
zMod 3D single cells

5.1.2 zBF

zBF example
zBF several single cells
zBF bad focus example

5.1.3 zDiff

zDiff example
zDiff several single cells
zDiff bad segmentation example

5.1.4 zEdge

zEdge example
zEdge several single cells

5.2 Segmentation

5.2.1 zBF segmentation

zBF segmentation example
Notable problems and artefacts
Protrusions and other fine details

5.2.2 zEdge segmentation

zEdge segmentation example
Notable problems and artefacts
Protrusions and other fine details

5.2.3 Classic segmentation

Classic segmentation example
Notable problems and artefacts
Protrusions and other fine details

6 Discussion

6.1 zMod sensitivity and the effects on zBF

Example of zMod images with R and SIGMA varying
Comments on the effect of smoothing GFP data in 2D and 3D
Effects of smoothing zMod data

6.2 zDiff reliability and its effects on zEdge

zDiff example

6.3 Comparison of classic and zEdge segmentation

Classic segmentation example
zEdge segmentation example
Problem comparison

7 Conclusion

7.1 Conclusion

7.2 Further work

7.2.1 zMean

zMean example
Compare zMean to GFP Z projection with max value

7.2.2 Brightfield profile

Brightfield profile example

7.2.3 Edge completion

Close-up of incomplete edge in protrusion
