Table of Contents	
List of Figures	i
List of Tables	. vii
Nomenclature	
Chapter 1 – Introduction	
1.1 Clinical Rationale and Background of Current Project	
1.2 Underlying Biology and Radiobiology Principles	
1.2.1 Cell Biology	
1.2.2 Radiobiology Principles	
1.2.2.1 Radiobiological phenomena	
1.3 Charged Particle Microbeams	
1.3.1 Charged Particle Microbeams	
1.3.2 Research Questions Addressed with Microbeams	1
1.3.3 Limitations of Microbeams	1
1.4 The Wolfson Surrey Vertical Microbeam	
1.4.1 Irradiation System	
1.4.2 The End-Station Microscopy Facility	
1.4.2.2 Imaging at the end-station microscopy facility	
1.5 Digital Microscopy and Image Processing	2
1.6 Project Objectives and Overview	2
Chapter 2 – Literature Review	2
2.1 Focus Assessment in Bright-Field Microscopy	2
2.2 Cell Detection in Bright-Field Microscopy	2
2.3 Cell Tracking	2
2.3.1 Cell Association	
2.3.2 Cell Division Detection	
2.4 Overview of Commercial Software Packages	3
Chapter 3 – Materials and Methods	3
3.1 Cell Dish Preparation	3
3.2 Cell Imaging	3

	3.2.1 Specimen Illumination	
3.3	MATLAB as Software Platform	2
3.4	Cell Detection in Bright-field Images	
	3.4.1 Testing of Existing Algorithms for Cell Detection	
	3.4.2 Design of a New Cell Detection Algorithm	
	3.4.2.1 Selection of suitable focal plane	
	3.4.2.2 Unsharp mask filter application	
	3.4.2.3 Image corner detection 3.4.2.4 Corner clustering	
	3.4.2.5 Outlier clustering	
	3.4.2.6 Centroid definition for cell targeting	
	3.4.3 Cell Detection Evaluation	(
	3.4.4 Separation of Touching Cells.	
	3.4.5 Calculation of Irradiation Time	
3.5	Cell Tracking in Time-Lapse Microscopy	
	3.5.1 Unsuccessful Cell Tracking Trials	
	3.5.2 Principles of Cell Tracking Method	
	3.5.2.2 Cell position generation for disappearing cells	
	3.5.2.3 Cell division detection	
	3.5.2.4 Measurement of cell migration and division	
	3.5.2.5 Option for on-line or off-line tracking	
	3.5.3 Assessment of Cell Tracking Module as Pilot Study	
3.6	Use of GPU Capacity	
	Integration to Microscope Software and GUI	
	Use of a Secondary Microscopy Facility for Project Development	
	- Results	
-	Cell Detection Results	
4.1		
	4.1.1 Detection of V79 Cells	
	4.1.3 Detection of U251 Cells.	
4.2	Cell Tracking Results	9
	4.2.1 Tracking of V79 Cells	9
	4.2.2 Tracking of U251 Cells	
	4.2.3 Tracking of MCF7 Cells	
4.3	Application Timing	
	4.3.1 Timing of Focal Plane Selection	
	4.3.2 Cell Detection Timing	10

4.3.3 Insight into Processing Time Optimisation	10
4.3.4 Irradiation Capacity	10
4.3.5 Cell Detection-Tracking Timing	10
Chapter 5 – Discussion	10
5.1 Overview of Project	10
5.2 Limitations and Recommendations for Future Work	11
Chapter 6 – Concluding Remarks	11
References	11
Appendix A – Mathematical Background	13
A.1 Focus Estimation Algorithms	13
A.2 Harris Comer Detection	13
Appendix B – Image Focus Estimation Results	13
Appendix C – Sensitivity-Robustness Analysis Results
